Package Edition Standard

Volume Licensing Available in 1, 5, and 10 licenses

Remarks 1 license is required for each GOT unit

Description

The Mitsubishi GT25-PCRAKEY-20 license package contains remote operation licenses that allow personal computers to be controlled over an Ethernet connection. Designed for the Mitsubishi GOT2000 series, it applies specifically to the GT25 and GT27 interface models. This device is classified as a standard license package and is packaged with 20 individual Ethernet licenses. This package can be used in large-scale Ethernet systems with several GOT units.

Each Mitsubishi GOT unit in the system necessitates one Ethernet license for full functionality, ensuring that systems are efficiently utilized in operational settings. The streamlined design of the Ethernet licenses in the GT25-PCRAKEY-20 package simplifies remote personal computer control implementation, enhancing operational capabilities across various applications.
