

Allen-Bradley 1747-OS401

.The Allen Bradley 1747-OS401 is available with a 2-Year DO Supply warranty. Request a quote now and receive a rapid response. Description

The 1747-OS401, a processor in the Allen Bradley SLC 500 series, offers extensive instruction support for advancing process control applications. This unit is compatible with SLC 5/04 architectures and enhances programming capabilities significantly. It efficiently uses indirect addressing for both word-level and bit-level references, providing greater flexibility in handling data.

This processor covers a spectrum of functionality through various instructions. Support for SCP, ABS, SWP, ASN, and ACS instructions ensures that users can perform a multitude of data manipulation and control tasks. Furthermore, it enables mathematical instructions, including ATN, cosine, sine, tangent, and natural logarithmic functions, which are vital for executing complex calculations. The capability to accommodate these diverse function sets makes the 1747-OS401 a robust component in automation environments.
